

The Aeffect R Stem

# UNASSUMING STRENGTH

**RACE  
FACE**

## FORM AND FUNCTION.

The Aeffect R stem has been completely redesigned for MY25. Manufactured using a 3D forging process and subsequently machined in critical areas, the finished product has an industrial look reminiscent of fully CNC-machined stems.

Engineering this stem in-house allowed us to achieve impressive strength and unique Race Face identity, all in an affordable package. Aeffect R satisfies the needs of the budget-conscious rider who still wants a high-quality and great-looking stem on their bike.

Confident and unassuming. Available in any colour, as long as it's black.

# ENDURO-RATED. UNIVERSALLY CELEBRATED.

Four available lengths with zero rise make this stem adaptable for everything from down-country to enduro. With 32mm, 40mm, 50mm and 60mm lengths in this precisely manufactured package, the right fit for the rider is the priority.

# CLEAN. INDUSTRIAL. TIMELESS.

A Top-Lock clamp style cleans up your cockpit and a continuous spine visually connects the faceplate and body in one sweeping shape. Once machined, stems are shot-peened and anodized for a consistent, matte black finish.

**Only 131g at 32mm length.**  
152g at 40mm; 161g at 50mm;  
169g at 60mm.

**Compatible with 1 1/8" steerers.**

**35mm handlebar clamp diameter.**

**38mm steerer stack height.**

**52mm handlebar clamping width.**

**32,40, 50 & 60mm stem lengths.**

**Industrial design and smooth  
matte finish.**

**Top-Lock clamp for a clean cockpit.**

**0° rise**

**Forged & machined  
6000-series aluminum.**

**Black only.**

**Lifetime Warranty**
